Title: SYSTEM AND METHOD FOR
IMPROVING TRANSRATING OF MPEG-
2 VIDEO

CERTIFICATE OF EXPRESS MAILING

I hereby certify that this paper and the documents and/or fees referred to as attached therein are being deposited with the United States Postal Service on November 30, 2005 in an envelope as "Express Mail Post Office to Addressee" service under 37 CFR §1.10, Mailing Label Number EV63281764US, addressed to the Commissioner for Patents, P.O. Box 1450 Alexandria, VA 22313-1450.

Ryan Eachus

Petition to Withdraw Holding of Abandonment
37 CFR §1.181

Commissioner for Patents
Box: DAC
Alexandria, VA 22313-1450

Dear Sir:

Applicants hereby request that the Notice of Abandonment mailed on November 16, 2005 be withdrawn in view of non-receipt of the Notice of Non-Compliant Amendment mailed on February 11, 2005. The following is a list of events that occurred prior to the issuance of the Notice of Abandonment.

A Restriction Requirement was issued in this case on April 13, 2004, and a response was filed May 27, 2004. A further office action was mailed on June 18, 2004 by the U.S. Patent Office and a response to the same was filed on August 24, 2004. The first Notice of Non-Compliant Amendment was issued on November 8, 2004. Applicants filed a response addressing the non-compliant issue on by facsimile on November 18, 2004. A second Notice of Non-Compliant Amendment was issued by the U.S. Patent Office on February 11, 2005. A response to the second Non-Compliant Amendment was filed via facsimile addressing the non-complaint issues on February 25, 2005.

It is applicants attorney of record's procedure to periodically check the status of any cases which have been examined via PAIR. A status check of the above application via PAIR was

done on November 9, 2005. An initial review of the File History page indicated that the last action in this case was our response to the second issued Notice of Non-Compliant Amendment filed on February 25, 2005. However, there was a discrepancy in the Image File Wrapper. In the image file wrapper screen, there was a document entitled "Miscellaneous Action with SSP". Upon reviewing that document, it appeared to be a third Notice of Non-Compliant Amendment that was issued by the U.S. Patent Office. The notice did not contain a cover page indicating when the document was mailed, only an entry date of February 25, 2005, which was the same day that Applicants second response was filed. We are enclosing a copy of our mail log dated February 25, 2005 through April 1, 2005 as evidence that we did not receive the document in our office.

As you can see by the above, Applicant's attorney made a good faith effort to reply to the second issued Notice of Non-Complaint amendment so that the application could proceed with further examination. Applicants earnestly request that the Notice of Abandonment in this application be withdrawn and the application be reinstated and passed to further examination in due course due to the fact that we did not receive the third issued Notice of Non-Compliant Amendment.

CONTINGENT PETITION TO REVIVE

Should the Commissioner conclude that the application has gone abandoned and that Applicants did not act timely, please treat this paper as a contingent Petition to Revive the Application under 37 C.F.R. §1.137(b). Any delay in responding to the third Notice of Non-Compliant Amendment in the above-identified application was unintentional.

If this paper is treated as a Petition to Revive under 37 C.F.R. §1.137(b), please charge the above-referenced deposit account in the amount of the petition fee set forth in 37 C.F.R. §1.17(m) (Order No. CISC250). The response to the third Notice of Non-Compliant Amendment is appended hereto.

Respectfully submitted,
BEYER WEAVER & THOMAS, LLP

Notice of Non-Compliant Amendment (37 CFR 1.121)

The amendment document filed on 2-28-05 is considered non-compliant because it has failed to meet the requirements of 37 CFR 1.121. In order for the amendment document to be compliant, correction of the following item(s) is required. Only the corrected section of the non-compliant amendment document must be resubmitted (in its entirety), e.g., the entire "Amendments to the claims" section of applicant's amendment document must be re-submitted. 37 CFR 1.121(h).

THE FOLLOWING CHECKED (X) ITEM(S) CAUSE THE AMENDMENT DOCUMENT TO BE NON-COMPLIANT:

- ☐ 1. Amendments to the specification:
- ☐ A. Amended paragraph(s) do not include markings.
 - ☐ B. New paragraph(s) should not be underlined.
 - ☐ C. Other _____
- ☐ 2. Abstract:
- ☐ A. Not presented on a separate sheet. 37 CFR 1.72.
 - ☐ B. Other _____
- ☐ 3. Amendments to the drawings: _____
- ☒ 4. Amendments to the claims:
- ☐ A. A complete listing of all of the claims is not present.
 - ☐ B. The listing of claims does not include the text of all pending claims (including withdrawn claims)
 - ☐ C. Each claim has not been provided with the proper status identifier, and as such, the individual status of each claim cannot be identified. Note: the status of every claim must be indicated after its claim number by using one of the following 7 status identifiers: (Original), (Currently amended), (Canceled), (Withdrawn), (Previously presented), (New) and (Not entered).
 - ☐ D. The claims of this amendment paper have not been presented in ascending numerical order.
 - ☐ E. Other: Cancelled claims should not include text

For further explanation of the amendment format required by 37 CFR 1.121, see MPEP Sec. 714 and the USPTO website at <http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/officflyer.pdf>.

If the non-compliant amendment is a **PRELIMINARY AMENDMENT**, applicant is given **ONE MONTH** from the mail date of this letter to supply the corrected section which complies with 37 CFR 1.121. Failure to comply with 37 CFR 1.121 will result in non-entry of the preliminary amendment and examination on the merits will commence without consideration of the proposed changes in the preliminary amendment(s). This notice is not an action under 35 U.S.C. 132, and this **ONE MONTH** time limit is not extendable.

If the non-compliant amendment is a reply to a **NON-FINAL OFFICE ACTION** (including a submission for an RCE), and since the amendment appears to be a *bona fide* attempt to be a reply (37 CFR 1.135(c)), applicant is given a **TIME PERIOD** of **ONE MONTH** from the mailing of this notice within which to re-submit the corrected section which complies with 37 CFR 1.121 in order to avoid abandonment. **EXTENSIONS OF THIS TIME PERIOD ARE AVAILABLE UNDER 37 CFR 1.136(a).**

If the amendment is a reply to a **FINAL REJECTION**, this form may be an attachment to an Advisory Action. The period for response to a final rejection continues to run from the date set in the final rejection, and is not affected by the non-compliant status of the amendment.

Ryan Eachus

RESPONSE TO THIRD NOTICE OF NON-COMPLIANT AMENDMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

This amendment is submitted in response to the original Communication dated February 25, 2005 in which the response required by 37 CFR 1.121 was deemed non-complaint because the Amendment's cancelled claims contained text. It is believe that the claims as presented currently now indicate the proper status identifiers, the withdrawn claims, and no text in the cancelled claims. As such, it should be treated as a complete response to the outstanding office action as required by 37 CFR 1.114 and 37 CFR 1.111.

Amendments to the Claims are reflected in the listing of claims on page 2 of this paper.

Remarks begin on page 10 of this paper.

IN THE CLAIMS

Independent claim 30 has been canceled. Dependent claim 31 has been amended and changed into independent form. The pending claims are provided below for the convenience of the Examiner.

1. (Original) A method of determining if the content of a source MPEG-2 stream, may be reduced, said method comprising the steps of:

- a) examining said source stream to determine if a sequence_display_extension follows the most recent sequence header and sequence extension;
- b) confirming that horizontal_size is greater than display_horizontal_size or that vertical_size is greater than display_vertical_size; and
- c) if steps a) and b) are met, reducing the content of said source stream to create a reformatted stream.

2. (Original) The method of claim 1 where step c) comprises the steps of:

- i) calculating the values of: width_mb and height_mb;
- ii) calculating the values of: top, bottom, left and right;
- iii) calculating the values: of top_mb, bottom_mb, left_mb and right_mb;
- iv) substituting into said reformatted stream a portion of new_horizontal_size for horizontal_size and a portion of new_vertical_size for vertical_size; and
- v) substituting into said reformatted stream a portion of new_horizontal_size for horizontal_size extension and a portion of new_vertical_size for vertical_size extension.

3. (Original) The method of claim 2 wherein the portion of step iv) is 12 bits.

4. (Original) The method of claim 2 wherein the portion of step v) is 2 bits.

5. (Original) The method of claim 2 further comprising the step of:

- vi) removing picture_display_extension data from said source stream when creating said reformatted stream,

6. (Original) The method of claim 5 further comprising the step of:

vii) removing macroblocks from said source stream if their horizontal position is less than left_mb or greater than right_mb or if their vertical position is less than top_mb or greater than bottom_mb, when creating said reformatted stream

7. (Original) The method of claim 6 further comprising the step of:

viii) removing slices from said source stream which contain no macroblocks, when creating said reformatted stream

8. (Original) The method of claim 7 further comprising the step of:

ix) subtracting the value of top_mb from each slice_start_code, if slice_start_code becomes less than one, then setting it to one, in said reformatted stream.

9. (Withdrawn) A system for reducing the content of an MPEG-2 source stream, said system comprising:

- a) a transcoder, said transcoder converting said source stream to a reformatted stream;
- b) a transmitter connected to said transcoder, for transmitting said reformatted stream;
- c) a receiver connected to said transmitter, for receiving said reformatted stream; and
- d) a decoder connected to said receiver, for decoding said reformatted stream and providing as output a viewable stream.

10. (Withdrawn) The system of claim 9 wherein said transcoder comprises selector means to determine if said source stream may be reduced to create said reformatted stream, said logical means comprising the steps of:

- a) examining said source stream to determine if a sequence_display_extension follows the most recent sequence header and sequence extension;
- b) confirming that horizontal_size is greater than display_horizontal_size or that vertical_size is greater than display_vertical_size; and
- c) if steps a) and b) are met, reducing the content of said source stream to create said reformatted stream.

11. (Withdrawn) The system of claim 10 wherein said transcoder further comprises calculation means for calculating and introducing into said reformatted stream new values for horizontal_size and vertical_size.

12. (Withdrawn) The system of claim 11 wherein said transcoder further comprises first removal means for removing picture_display_extension data from said source stream when creating said reformatted stream.

13. (Withdrawn) The system of claim 12 wherein said transcoder further comprises second removal means for removing macroblocks from said source stream when creating said reformatted stream.

14. (Withdrawn) The system of claim 13 wherein said transcoder further comprises slice removal means for removing slices from said source stream when creating said reformatted stream.

15. (Withdrawn) The system of claim 14 wherein said transcoder further comprises means for recalculating the value for slice_start_code fields.

16. (Original) A computer readable medium containing instructions for reducing the content of an MPEG-2 source stream, said instructions performing the steps of:

- a) examining said source stream to determine if a sequence_display_extension follows the most recent sequence header and sequence extension;
- b) confirming that horizontal_size is greater than display_horizontal_size or that vertical_size is greater than display_vertical_size; and
- c) if steps a) and b) are met, reducing the content of said source stream to create a reformatted stream.

17. (Original) The medium of claim 16 wherein step c) comprises the steps of:

- i) calculating the values of: width_mb and height_mb;
- ii) calculating the values of: top, bottom, left and right;
- iii) calculating the values of top_mb, bottom_mb, left_mb and right_mb;
- iv) introducing into said reformatted stream a portion of new_horizontal_size for horizontal_size and a portion of new_vertical_size for vertical_size; and

v) introducing into said reformatted stream a portion of new_horizontal_size for horizontal_size extension and a portion of new_vertical_size for vertical_size extension.

18. (Original) The medium of claim 17 wherein the portion of step iv) is 12 bits.

19. (Original) The medium of claim 18 wherein the portion of step v) is 2 bits.

20. (Original) The medium of claim 19 further containing the step of:

vi) in creating said reformatted stream, removing picture_display_extension data from said source stream.

21. (Original) The medium of 20 further containing the step of:

vii) in creating said reformatted stream, removing macroblocks from said source stream if their horizontal position is less than left_mb or greater than right_mb or if their vertical position is less than top_mb or greater than bottom_mb.

22. (Original) The medium of claim 21 further containing the step of:

viii) in creating said reformatted stream, removing slices from said source stream which contain no macroblocks.

23. (Original) The medium of claim 22 further containing the step of:

ix) subtracting the value of top_mb from each slice_start_code, if slice_start_code becomes less than one, then setting it to one, in said reformatted stream.

24. (Withdrawn) A system for repositioning frames in an MPEG-2 stream said system comprising repositioning means, said repositioning means utilizing pan-scan information to relocate a display rectangle to a reconstructed frame.

25. (Withdrawn) The system of claim 24 wherein said repositioning means comprises:

a) selector means to determine if said frames in said stream are applicable for repositioning.;

b) first calculation means for calculating the values of: width_mb and height_mb;

c) second calculation means for calculating the values of: top, bottom, left and right;

- d) third calculating means for calculating the values: of top_mb, bottom_mb, left_mb and right_mb; and
- e) modification means for creating a reformatted stream based upon the input from steps b) to d).

26. (Withdrawn) The system of claim 25 wherein said modification means comprises picture removal means for removing picture_display_extension data from said source stream when creating said reformatted stream,

27. (Withdrawn) The system of claim 26 wherein said modification means further comprises macroblock removal means for removing macroblocks from said source stream if their horizontal position is less than left_mb or greater than right_mb or if their vertical position is less than top_mb or greater than bottom_mb, when creating said reformatted stream

28. (Withdrawn) The system of claim 27 wherein said modification means further comprises slice removal means for removing slices from said source stream which contain no macroblocks, when creating said reformatted stream

29. (Withdrawn) The system of claim 28 wherein said modification means further comprises subtraction means for subtracting the value of top_mb from each slice_start_code, if slice_start_code becomes less than one, then setting it to one, in said reformatted stream.

30. (Canceled)

31. (Currently Amended) A video transcoder including a pan-scan module, the pan-scan module configured to perform the following steps:~~The transcoder of claim 30 wherein said pan-scan module performs the following steps:~~

- a) examining a source video stream to determine if a sequence_display_extension follows the most recent sequence header and sequence extension;
- b) confirming that horizontal_size is greater than display_horizontal_size or that vertical_size is greater than display_vertical_size; and
- c) if steps a) and b) are met, reducing the content of said source stream to create a reformatted stream.

32. (Original) The transcoder of claim 31 where step c) comprises the steps of:
- i) calculating the values of: width_mb and height_mb;
 - ii) calculating the values of: top, bottom, left and right;
 - iii) calculating the values: of top_mb, bottom_mb, left_mb and right_mb;
 - iv) substituting into said reformatted stream a portion of new_horizontal_size for horizontal_size and a portion of new_vertical_size for vertical_size; and
 - v) substituting into said reformatted stream a portion of new_horizontal_size for horizontal_size extension and a portion of new_vertical_size for vertical_size extension.
33. (Original) The transcoder of claim 32 wherein the portion of step iv) is 12 bits.
34. (Original) The transcoder of claim 32 wherein the portion of step v) is 2 bits.
35. (Original) The transcoder of claim 32 wherein said pan-scan module performs the additional step of:
- vi) removing picture_display_extension data from said source stream when creating said reformatted stream,
36. (Original) The transcoder of claim 35 wherein said pan-scan module performs the additional step of:
- vii) removing macroblocks from said source stream if their horizontal position is less than left_mb or greater than right_mb or if their vertical position is less than top_mb or greater than bottom_mb, when creating said reformatted stream
37. (Original) The transcoder of claim 36 wherein said pan-scan module performs the additional step of:
- viii) removing slices from said source stream which contain no macroblocks, when creating said reformatted stream
38. (Original) The transcoder of claim 37 wherein said pan-scan module performs the additional step of:

ix) subtracting the value of top_mb from each slice_start_code, if slice_start_code becomes less than one, then setting it to one, in said reformatted stream.

39. (Withdrawn) A pan-scan module, said pan-scan module residing within a video transcoder, said module comprising:

a) a selector for examining a source stream to determine if said source stream may be reduced;

b) a first calculator accepting as input said source stream to calculate the values of: width_mb and height_mb;

c) a second calculator accepting as input said source stream for calculating the values of: top, bottom, left and right;

d) a third calculator accepting as input said source stream for calculating the values of top_mb, bottom_mb, left_mb and right_mb; and

e) a modifier taking as input the calculations performed by said first, second and third calculators to create a reformatted stream.

40. (Withdrawn) The module of claim 39 wherein said modifier performs the steps of:

i) introducing into said reformatted stream a portion of a portion of new_horizontal_size for horizontal_size and a portion of new_vertical_size for vertical_size; and

ii) substituting into said reformatted stream a portion of new_horizontal_size for horizontal_size extension and a portion of new_vertical_size for vertical_size extension.

41. (Withdrawn) The module of claim 40 wherein the portion of step i) is 12 bits.

42. (Withdrawn) The module of claim 41 wherein the portion of step ii) is 2 bits.

43. (Withdrawn) The module of claim 40 wherein said modifier performs the additional step of:

iii) removing picture_display_extension data from said source stream when creating said reformatted stream,

44. (Withdrawn) The module of claim 43 wherein said modifier performs the additional step of:

iv) removing macroblocks from said source stream if their horizontal position is less than left_mb or greater than right_mb or if their vertical position is less than top_mb or greater than bottom_mb, when creating said reformatted stream

45. (Withdrawn) The module of claim 44 wherein modifier performs the additional step of:

v) removing slices from said source stream which contain no macroblocks, when creating said reformatted stream

46. (Withdrawn) The module of claim 45 wherein said modifier performs the additional step of:

vi) subtracting the value of top_mb from each slice_start_code, if slice_start_code becomes less than one, then setting it to one, in said reformatted stream.

REMARKS

Claims 1-8, 16-23, and 31-38 are pending. Claims 9-15, 24-29, and 39-46 were withdrawn from consideration. Claim 30 was canceled. Claims 1, 16, and 31 were rejected under 35 U.S.C. 103(a) as being unpatentable over Tahara (6,560,282).

Tahara describes an MPEG encoder that receives "past encoding parameters" generated at a past encoding process. Encoding parameters used during multiple generations of encoding are stored in a decoding history to allow minimal picture change "even if encoding and decoding processes are carried out repeatedly by the transcoder" (Abstract, Figures 14-15). " Since conventional encoding and decoding processes based on the MPEG standard are not 100% reverse processed, the picture quality deteriorates each time encoding and decoding processes are carried out as is generally known. In such a case, encoding parameters such as the quantization scale, the motion vector and the prediction mode are not merely re-computed in the encoding process of the third generation. Instead, the encoding parameters such as the quantization scale, the motion vector and the prediction mode generated in the encoding process of the first generation are re-utilized... Thus, by re-utilizing the encoding parameters generated in the encoding process of the first generation, it is possible to lower the degree to which the picture quality deteriorates even if the encoding and decoding processes are carried out repeatedly"(Two paragraphs before the beginning of the Figure 16 description).

Consequently, Tahara describes a technique that decreases picture degradation associated with each encoding and decoding process.

By contrast, the independent claims recite "examining a source video stream to determine if a `sequence_display_extension` follows the most recent sequence header and sequence extension." The material the Examiner cited merely mentions the "`sequence_display_extension`" as an item in a history stream. However, the material the Examiner cited does not teach or suggest determining if the "`sequence_display_extension` follows the most recent sequence header and sequence extension"

Furthermore, the independent claims recite "confirming that `horizontal_size` is greater than `display_horizontal_size` or that `vertical_size` is greater than `display_vertical_size`." Although Tahara does not teach or suggest this element, the Examiner argues that it would be

obvious to one of skill in the art to create a reformatted stream by recognizing that the horizontal/vertical size is greater than the display horizontal/vertical size to meet the required bandwidth limitation. However, in order to make this argument, there must be some motivation in Tahara or elsewhere to combine Tahara with the idea to create a reformatted by recognizing the difference in sizes. It is respectfully submitted that Tahara does not provide such a motivation. Tahara emphasizes that its technique does not cause picture degradation. That is, repeated encoding and decoding will lead to substantially the same picture.

By contrast, the techniques of the present invention cause loss of information. By recognizing differences in horizontal and vertical sizes versus display sizes, the claims recite "reducing the content of said source stream to create a reformatted stream." Tahara does not reduce the content of said source stream and in fact at least maintains the size or even increases the size with an additional "history stream."

Consequently, it is believed that Tahara does not teach or suggest "determining if the sequence_display_extension follows the most recent sequence header and sequence extension," does not provide the motivation and in fact teaches away from determine "if horizontal_size is greater than display_horizontal_size," and does not "reduce the content of said source stream" and may in fact increase the content of said source stream.

In light of the above remarks relating to the independent claims, the remaining dependent claims are believed allowable for at least the reasons noted above. Applicants believe that all pending claims are allowable and respectfully request a Notice of Allowance for this application from the Examiner. Should the Examiner believe that a telephone conference would expedite the prosecution of this application, the undersigned can be reached at the telephone number set out below.

Respectfully submitted,
